In reference too NAB's petition 04-160. I would just like to know why the NAB feels the need to place a large number of tractor-trailer drivers as well as the general public in a dangerous situation. As a professional driver I personally rely upon the traffic reports the XM Radio provides to avoid unnecessary dangers to myself and the general public. Does anyone at the NAB want to take a load of battery acid into a traffic jam? I would think not! Although traffic jams cannot always be avoided, XM radio traffic reports helps me to avoid a greater number of them.

Respectfully,
Michael B. Hinze
